CHECKLIST FOR RESUME

Contact details	Phone number, Address (Mention the City), Email id, GitHub, LinkedIn
Summary	Briefly outline your career goals and what you aim to achieve in a developer role, alongside a summary of your professional background(If experienced), skills and achievements. This helps highlight your aspirations and what you bring to the position. Avoid Personal pronouns.
Certifications	Name of the certificate, What you have learnt under the Certifications, platform and the year
Projects	Provide detailed project information, including the project name, live link, and GitHub repository link. Additionally, include a brief description, key contributions, and the technologies/tools used.
Skills	All your technical skills as per knowledge by categorizing. Interpersonal skills which you have, and company needs and as per JD
Education	Education details with marks (only if the Gpa is high) & the College name
Experience	Your job details with the company name and role of actions. If it's Non-it experience, please mention only transferrable roles and responsibilities.
Achievements	Mention all your awards and rewards received at college/company
Co-Curricular & Volunteering Experience	Include the recognitions and participations in events or initiatives at college or workplace, along with

	involvement in co-curricular activities, competitions, leadership roles, and volunteer work
Language skills	Avoid the common languages and mention (if you know other languages like Spanish, German etc)
Build an ATS friendly resume	Use simple formatting: avoid graphics, complex layouts and tables, include relevant keywords: tailor your resume to the JD using specific terms Submit in compatible formats like .docx or pdf formats, ensuring text is selectable
Note: Recent graduates can go with organizations, co-curricular activities	

Description with Instances

Summary: For Instance:

1. Creative Full Stack Developer with expertise in **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **strong problem-solving abilities**. Skilled in building scalable **web applications, API development, and front-end design.** Adept at collaborating with teams, adapting to new technologies, and delivering efficient solutions. Passionate about continuous learning and innovation.

2. **Data Science & Machine Learning** professional with expertise in **data analysis, statistical modeling, machine learning algorithms, and data visualization**. Proficient in **Python, SQL, Pandas, NumPy, and TensorFlow**, with experience in building predictive models and deriving actionable insights. Strong problem-solving, analytical thinking, and collaboration skills, with a passion for leveraging data to drive impactful decisions.

3. Dynamic Python Developer with expertise in backend development, automation, and data handling. Proficient in **Python, Django, Flask, SQL, and REST APIs,** with experience in building scalable applications and optimizing performance. Strong problem-solving skills, logical thinking, and a passion for writing clean, efficient code.

CERTIFICATIONS

Python:

Python Programming with Django – Entri Elevate Jan 2024 - Jul 2024

Certification in Python Programming – Illinois Tech US Jan 2024 - Jul 2024

- Developed dynamic web applications and RESTful APIs using Python, Django, MySQL, HTML, CSS, JavaScript, and AWS, demonstrating strong skills in building robust web solutions.

FSD:

CERTIFICATION IN FULL STACK DEVELOPMENT (MERN) Sep 2023 - Dec 2024

Illinois Tech US

FULL STACK DEVELOPMENT (MERN) Sep 2023 - Dec 2024

Entri Elevate

• Covered both front-end and back-end technologies, including HTML, CSS, JavaScript, and React.js for building dynamic user interfaces.

• Explored server-side development with Node.js and Express.js while integrating MongoDB for efficient data storage and retrieval.

SWT:

Certification in Software testing - Illinois Tech Us Sep 2023 - Dec 2024

- Learned advanced techniques in manual and automated software testing, including test case design, defect tracking, and performance testing tools.

Certification in Software testing - Entri Elevate Sep 2023 - Dec 2024

- Learned to work with industry-standard testing tools like Selenium, JIRA, and Jmeter to automate and manage test cases effectively.

DSML:

Certification in Data Science & Machine Learning Aug 2023 – Jan 2024
Illinois Tech US

Data Science & Machine Learning Aug 2023 – Jan 2024
Entri Elevate

- Covered topics including data analysis, data visualization, statistical modeling, and machine learning algorithms.
- Developed projects demonstrating practical applications of machine learning in various domains.

DA:

Certification in Data Analytics Aug 2023 – Jan 2024

Illinois Tech, US

Data Analytics Certification Aug 2023 – Jan 2024

Entri Elevate

- Covered key concepts including data analysis, data visualization, statistical modeling, and business intelligence.
- Developed projects demonstrating practical applications of data analytics in real-world scenarios.

PROJECTS:

FSD:

Food Order Website **Live Link | GitHub Link**

• Developed a dynamic food ordering platform enabling users to browse restaurants, customize orders, apply coupon codes, and complete secure payments via Stripe.

• Implemented real-time notifications to enhance user engagement. Designed a role-based authentication system for admins, restaurant owners, and users to manage access and permissions efficiently.

PYTHON:

Drowsiness Detection System **GitHub**

• Engineered a web-based Drowsiness Detection System utilizing Django, Python, HTML, CSS, and JavaScript with SQLite as the database.

• Collaborated as a college project to implement Machine Learning functionalities that detect driver drowsiness and trigger alerts.

DSML:

COVID-19 Data Analysis using Power BI **GitHub**

- Developed a dynamic Power BI dashboard to explore and visualize COVID-19 data, focusing on key metrics and trends to understand the impact of the SARS-CoV-2 virus on global health, economies, and societies.

- Utilized advanced data analytics techniques to identify patterns and trends.

SWT:

YI Home/KAMI Home

- Led the manual and automation testing of mobile and web-based home security products.
- Developed and executed comprehensive test cases to ensure functional accuracy and system reliability.
- Performed detailed functional testing and regression testing to identify and resolve software issues

SKILLS:

DSML:

Techniques: Hypothesis Testing, Recommendation Engines, Customer Segmentation Analysis (Advanced)

Tools and Frameworks: ElasticSearch, Python Libraries (Pandas, Numpy, Keras, Scikit-learn), Hadoop, Python, Databases (MySQL), Git

Data Visualization: Tableau (Advanced), Microsoft Power BI

FSD:

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap, VITE, Tailwind CSS

Backend: Node.js, Express.js, Struts, Spring

Databases: MySQL, MongoDB

Proficiency: Figma, Framer

Soft Skills: Analytical and Problem Solving Skills, Collaboration and Teamwork, Communication and Presentation Skills, Time Management and Prioritization, Self-Motivation and Continuous Learning

PYTHON:

Programming Languages : Python, HTML, JavaScript, CSS

Frameworks : Django, Django Rest Framework

Libraries : Celery, All AUTH

Tools : VS Code, Redis, Postman, Rabbit MQ

Version Control : Git, GitHub

Databases : MySQL

SWT:

- Strong Experience in web & Mobile Application Testing and bug tracking tool Jira
- Understanding of SDLC, STLC and Defective Life Cycle.
- Understanding of different testing types: Functional & Non-Functional Testing, Integration Testing,Regression Testing, Security Testing, Compatibility Testing & System Testing.
- Experience in Manual , Automation testing (Selenium Java)
- Experience in testing functionality on IOS and android applications.

ACHIEVEMENTS:

- Achieved a **5 Star Gold Badge on Hacker Rank** for successfully solving a diverse range of programming problems in Python.
- Awarded **"Best Employee of the Month/Year"** for outstanding performance.
- **NCC "C"** Certificate holder.
- Secured top **X rank in university/college** for academic excellence.

CO-CURRICULAR & VOLUNTEERING EXPERIENCE:

- Participated in national-level debates/public speaking competitions, securing **[Rank/Recognition].**
- Served as **[Position] in [College Club/Society],** organizing events and workshops.
- Represented college in sports competitions, winning **[Medals/Certificates].**
- Conducted awareness programs on **[Topic],** impacting X people.
- Actively participated in **blood donation camps/health awareness programs**.

POINTS TO REMEMBER:

1. Prioritize Relevant Skills:

- Start your resume with a prominent "Skills" section.
- List technical skills, programming languages, and tools that are directly relevant to the job you're applying for.
- Consider categorizing your skills into sections like "Programming Languages," "Web Development," "Database Management," etc.

2. Highlight Key Achievements:

- In your "Professional Experience" section, focus on highlighting your key achievements and contributions in each role.
- Use action verbs and specific details to describe what you accomplished, such as completing projects, improving processes, or solving complex problems.
- Quantify your achievements whenever possible by mentioning percentages, dollar amounts saved, or project completion times.

3. Tailor Your Resume:

- Customize your resume for each job application by emphasizing skills and accomplishments that align with the specific job requirements.
- Use keywords from the job description to demonstrate that you possess the skills and experiences sought by the employer.

4. Use Metrics and Data:

- Whenever possible, use data and metrics to support your accomplishments. For example, mention how your work led to increased website traffic, reduced server response times, or improved user satisfaction scores.
- Use graphs or charts if appropriate, but ensure they are easy to understand.

5. Certifications and Training:

- Highlight any relevant certifications, courses, or training programs you've completed. Mentioning these demonstrates your commitment to continuous learning and skill development.

7. Problem-Solving Stories:

- Incorporate brief stories or examples that showcase your problem-solving abilities. Describe a challenging technical problem you encountered and how you solved it.

8. GitHub or Portfolio Links:

- Include a link to your GitHub profile or an online portfolio if you have one.
- Your GitHub profile can serve as a living showcase of your coding skills and contributions to open-source projects.

9. Show Consistency:

- Ensure consistency in your resume. If you mention a specific technology or skill in your skills section, back it up with relevant experience or achievements in the professional experience section.

10. Be Concise and Clear:

- Keep your language concise and avoid jargon or overly technical terms that the reader may not understand. Use bullet points for easy readability and clarity.

11. Use Action Verbs:

- As mentioned earlier, use action verbs (e.g., developed, implemented, led) to start your accomplishment statements. These convey a sense of action and achievement.

12. Keep It Updated:

- Regularly update your resume to reflect your latest skills, certifications, and achievements. - Even when you're not actively job hunting, maintaining an up-to-date resume is good practice.
